Background

Belden Resources partners with First US Finance LLC which was formed in 2011. First US Finance is a commercial equipment financing firm designed to fill the gap left by commercial lenders by making capital available for all types of businesses and non-profits. We offer equipment financing, commercial loans, project financing, collateral loans, start-up financing and working capital loans for all size companies throughout the USA. We can approve more quickly than traditional lenders and have no upfront fees or large deposits. Our process calls for minimal paperwork while offering a streamlined credit review for fast results. We provide personalized service tailored to your needs along with a variety of lending solutions to meet all business goals.

Core Services

Commercial Equipment Financing, Capital Leases & Loans

We offer equipment financing and loan programs from \$20,000 to multi-million-dollar projects with standard terms from 3 to 7 years. We provide capital finance leases and loans, with complete ownership at the end of the term. Project financing can be made to include multiple vendors for projects built in several phases.

Vendor & Distributor Programs

We provide tailored vendor and distributor programs to companies selling their products to other businesses (B2B). We partner to become a virtual in-house finance department, allowing vendors to offer finance options with each quote or proposal. The program includes branded forms and training. By offering credit terms to the buyer, the vendor's profit increases greatly while providing a complete solution for their client.

Special Projects and Asset-Based Financing including PPAs and Aircraft Finance

We specialize in financing all energy systems like solar and LED lighting equipment with terms from 3 to 7 years at competitive rates. Power Purchase Agreements (PPAs) are available from 20 to 25 years for larger solar projects. We provide asset-based financing for companies wanting to leverage current equipment into a capital loan, invoice factoring for converting receivables into cash and working capital loans for immediate business needs. Our aircraft finance program provides terms of 5 to 20 years with low rates for personal and commercial use within the U.S.

Typical Equipment & Projects Financed

Commercial Solar	LED Lighting
Industrial Machines	Heavy Machinery
Construction Equipment	Aircraft for business and personal
Medical Equipment	Theater Video, Audio and Software systems
Commercial Real Estate	Vocational and Transport Vehicles
